PROFILE

A front-end engineer based in New Delhi, India with handful experience in building backends. As a software developer at a food tech startup, worked on frontend, backend and deployment as well as working closely with designers in setting standards via component library. Have experience with REST/GraphQL APIs, Docker, AWS EC2/S3, ReactJs/Apollo, Hasura/Postgres.

EXPERIENCE

Aug 2019 -Aug 2021 SDE 1 at Dailykit

New Delhi, India
Bangalore, India
<https://www.dailykit.org>
Worked on building core infrastructure for dailykit's software ecosystem. Built consumer facing applications like blue apron style ecommerce. Responsible for integration services like payment, delivery etc. As a first developer at the company, set a strong foundation for future team members by introducing code, git, component library standards.

Jan - May 2019 UX/UI Designer at Geb & Nut Pvt. Ltd.

New Delhi, India
Worked on a HRMS application's UX/UI. The process involved meeting with stakeholders, discussing their vision for the application. Then working on user research, feedback, flows and wireframing, prototyping, building a minimal design system to support the development in future and for easier dev hand-off.

June - Aug 2018 UI/UX Design Intern at SamayLa

June - July 2017 Front-End Developer Intern at Adaan Digital Solutions

EDUCATION

2015 - 2019 Maharishi Dayanand University
Rohtak Bachelor of Technology - Computer Science

2012 - 2014 Convent of Gagan Bharti
New Delhi Computer Science
